DESIGN PORTFOLIO

PROFESSIONAL WEB DESIGN, E-COMMERCE INTEGRATION & GRAPHIC DESIGN

About Us & What We Have to Offer

Whether you are a small start-up, or a well-established corporation, every business requires a professionally presented corporate Identity and online presence to match your service and product offering.

Effective and affordable website design is my absolute passion and whether you are in need of a small and presentable project, or a more elaborately developed and designed, then you have found your man (or lady, to be more correct).

I offer technical support on all completed online projects, as well as highly affordable and competitive maintenance options which just makes it so much easier for you and enables you to do what you do best – run your business!

I am based in Pretoria, Gauteng, but I have clientele scattered right across South Africa, as well as a few clientele abroad. I am also able to assist you with the registration of domains not only locally, but of foreign domain extensions too. My service is fully comprehensive, meaning, that if you are to design and set up a website with Striking Designs, I offer the whole broader spectrum of services that facilitate the ease of setup e.g. domain registration, hosting, web design and development, as well as the technical support for all your email accounts affiliated with your organization.

Striking Designs started as a Web Design Consultancy, specializing in the design and setup of EFFECTIVE websites which have been tailored to meet the specific needs of the Client. I have expanded my services and product offering to that of Printing, Full Corporate Branding and The manufacturing of all signage and marketing media to best suite the requirements of my clientele.

My aim is to always have helped my clients achieve value-based support in the marketing of their brand as well as in the attainment of perfection in the establishment of their presence on the web as well as brand visibility and recognition by their current and potential target market. I am partly a web design company offering a cost-effective / affordable and complete solution in professional web design that is uniquely tailored to work for YOU. When I design a custom website, I work hand in hand with you to first closely analyze your individual requirements and your user's needs in order for us to be enabled to make carefully considered decisions regarding the content, functionality, technology, as well as the look and feel of the final design. I offer a comprehensive web design service irrespective of whether you are in need of a brand new site, a complete re-design / re-structuring of an existing website or your existing design being made to rank better on search engine listings.

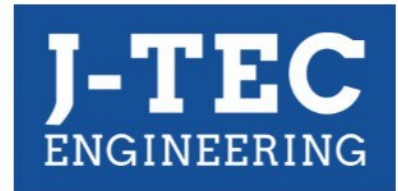

My core business focal point / area of expertise is on that of, but not limited to, small to medium businesses, start-up businesses and entrepreneurs. I have attained great success with assisting my current clientele basis in achieving greater market exposure for their brand recognition within their given areas of specialization.

the better seal

DEPAC STYLE 270

DEPAC seal style 270 is a stationary design cartridge mounted single mechanical seal. It has been developed for simple and easy change from packing to mechanical seals without modification of the existing equipment.

The stationary design principle developed by DEPAC for the process industry ensures highest reliability and smooth running even in difficult seal applications.

ADVANTAGES

- Simple change from packing to mechanical seals possible
- Seal tested for bioprocessing
- Cartridge mounted
- Pressure balanced
- Multiple spring design and springs made of Hastelloy C
- No clogging of springs
- No need for seal flush connection (up to 0.7 m 2.3 ft)

the better seal

DEPAC STYLE 370

For all applications where DIN 3281 / flange measurements are required, DEPAC offers a seal system for every application. For other housing and connecting dimensions, including inch sizes, DEPAC will manufacture according to your requirements. The flange seal faces, as well as certain housing parts are interchangeable. The user can reduce the inventory level with a broad exchange of parts to fit all applications. This is called a modular system. This system warrants also, as already described, the stationary seal advantages necessary to optimize the service life.

ADVANTAGES

- DIN-measurements, inch alternatives are possible
- Shock and vibration dampened secondary forces
- Double pressure balanced
- Complete pressure reversal possible
- Automatic closing with pressure reverse
- Minor magne face design
- Direction of rotation independent

the better seal

DEPAC STYLE 186K

DEPAC component seal style 186K is a dynamic single seal which has been developed especially to replace common elastomer bellows seals.

This seal type fits in installation spaces according to DIN 24740 / EN 12756 but is designed with a shorter installation length. Style 186K can be combined with all common stationary seals. This seal is characterized by universal application opportunities and is suitable for many different sectors of industry.

ADVANTAGES

- Replaces common component seals with short installation length
- Axial and radial mounting possibility
- Short installation length
- Pressure balanced
- Direction of rotation independent
- Multiple spring design and springs made of Hastelloy C
- No fretting of shaft
- No clogging of springs
- Can be combined with various stationary seals

FACTOR

Seal it the Mechanical Way

Leaders in the Mechanical Seal Industry
